# Sain Engineering Associates

## The Challenge

Sain Engineering Associates (SEA) was hired by the US Military to conduct a lighting audit on an Army Installation. Previous attempts had stalled due to size and complexity.

More accurate and detailed audit data in half the time.

## The Solution

Armed with EMPEQ's Fast Site Survey®, SEA was able to:

- Complete a complicated audit that had gotten the previous firm fired
- Finish their deliverable in 3-months rather than 6
- Save \$38,000 in per diem alone
- Provide an unexpected family vacation for the auditor

## A Closer Look

By saving the day with Fast Site Survey, SEA was able to enhance its reputation with the US Military through its efficient, accurate, detailed audit of one of the largest Army Installations on the West Coast. And instead of sweating over his paper notes in the summer sun, the auditor was able to enjoy an unanticipated month-long family camping trip in Colorado.
