

YOUR TRUSTED TECHNOLOGY PARTNER FOR IDENTIFYING AND ORDERING PARTS

CORE COMPETENCIES

EMPEQ's AI-enabled Instant Equipment Insights identifies parts, recognizes defective components, and facilitates ordering replacements all with one click of a smartphone's camera.

EFFICIENCY

97% time savings on any other part identification method.

DATA VISIBILITY

Use AI to track part sourcing history and identify defects with one picture from an edge device.

SECURITY

NIST 800-171 third-party certification & strict security measures means your data is safe with us.

PAST PERFORMANCE

Current customers include the US Air Force, US DOE, US Army, US Army Reserves, US Marines, Johnson Controls, Siemens, Sain Engineering, Trane, and many others.

DIFFERENTIATORS

Your team can easily purchase from EMPEQ via the SBIR Contract vehicle.

The only secure, artificial intelligence based, instant-part identification and ordering system.

With Instant Equipment Insights, customers can finally accurately identify, track, and order parts from any of the nearly 1 million companies participating in the DoD's supply chain.

Customer support is available 24-7 to ensure your team members can feel confident and complete their jobs on time, every time.
